

HYDRO KOMBY 40

IMPROVES FRUIT UNIFORMITY AND SIZE IMPROVES BRIX DEGREE LEVELS REDUCES VEGETATIVE VIGOUR

HYDRO KOMBY 40 is the nutritional solution that is applied to the roots to improve product quality parameters like: uniformity, color, taste, sugar level, aromas, shelf-life and precocity. The specific phosphorus and potassium ratio and the presence of chelated microelements (to prevent damaging deficiencies that could undermine production) make HYDRO KOMBY 40 the ideal product to guide and support the crops' development and production targets, from fruit-set to ripening. It is necessary even when excessive development must be checked or when growth must be forcibly blocked.
