**TRIGGERS HEALING PROCESSES**  
**IMPROVES CROP PHYSIOLOGICAL CONDITIONS**  
**HIGH EFFICACY WITH REDUCED COPPER DOSE RATES**  
**ALLOWED IN ORGANIC FARMING**

KODENS Cu is a nutritional specialty that target the crops' general conditions and activates their natural resistance mechanisms. It contains copper complexed by gluconic acid, which is a natural complexing agent that speeds nutrients' uptake and translocation through the sap with the effect to stimulate photosynthesis, acting as a powerful plant anti-stress. This allows you to maximize results already at low dosages.

KODENS Cu contains also boron that determines a greater lignification of the tissues and a greater strengthening of the stem, thus increasing the mechanical resistance to damages caused by biotic and abiotic agents.

The formula is completed by the presence of a high amount of natural biopolymers that stimulates production of endogenous secondary metabolites, triggering the crop's natural resistance to the development of fungi, bacteria and viruses and also forms a thin layer on the treated parts (biodegradable transpiring film) warranting highest efficacy even in the toughest agronomic and pedoclimatic conditions.
